

ACRYLIC GEL DUO INSTRUCTIONS

1) Prep Nails:

Push back cuticles, lightly buff shine off, dust & wipe nail with either 99% alcohol, pure acetone or similar.

2) Apply plastic nail tip.

3) File, shape, buff nails as desired.

4) Using a lint free nail wipe and 99% alcohol, remove all dust and oils.

5) Dip a Nailite gel brush in the Acrylic Gel and then in the Acrylic Powder.

6) Brush a thin layer onto the nail from the cuticle to free edge being careful not to touch the skin.

7) Cure in a 9 Watt lamp for 2-3 minutes.

8) Apply a second coat and cure, the same as above. If needed, apply a third coat.

9) Remove the tacky residue using a lint free nail wipe and 99% alcohol.

10) Finish by applying Nailite High Gloss Tackless Sealer in a thin, even layer.

11) Cure for 2 minutes in a 9 Watt lamp. No tacky residue will remain.

If you see dips in the nail, apply another coat of Acrylic Gel Duo before sealing. This is a sign that more product is needed on the nail.
