

## **Colored Gel Polish**

Nailite's Colored Gel Polish can be applied over artificial nail enhancements or over natural nails as a substitute for traditional nail polish.

Over a Finished Artificial Nail Enhancement:

- 1) Using a lint free nail wipe, clean the finished artificial nail enhancement with 99% alcohol.
- 2) Apply a thin layer of Nailite Colored Gel Polish, brushing from the cuticle to free edge (just as you would apply traditional nail polish) making sure not to touch the skin.
- 3) Cure in a 9 Watt lamp for 2 minutes.
- 4) Without removing the tacky residue, apply a second coat of Nailite Colored Gel Polish.
- 5) Cure in a 9 Watt lamp for 2 minutes.
- 6) If desired, apply a third coat and cure as above.
- 7) Remove the tacky residue with 99% alcohol.
- 8) Apply Nailite High Gloss Tackless Sealer in a thin, even layer
- 9) Cure in a 9 Watt lamp for 2 minutes. No tacky residue will remain.

Over a Natural Nail Manicure:

- 1) Using a lint free nail wipe, clean the finished natural nail with 99% alcohol.
- 2) Apply a thin base layer of Nailite Gentle Gel, brushing from the cuticle to the free edge.
- 3) Cure in a 9 Watt lamp for 2 minutes.
- 4) Remove the tacky residue with 99% alcohol.
- 5) Apply a thin layer of Nailite Colored Gel Polish or for a soak off service, Nailite Soak Off Colored Gel Polish, brushing from the cuticle to free edge (just as you would traditional nail polish) making sure not to touch the skin.
- 6) Cure in a 9 Watt lamp for 2 minutes.
- 7) Without removing the tacky residue, apply a second coat of Nailite Colored Gel Polish or for a soak off service, Nailite Soak Off Colored Gel Polish.
- 8) Cure in a 9 Watt lamp for 2 minutes.
- 9) If desired, apply a third coat and cure as above.
- 10) Remove the tacky residue with 99% alcohol.
- 11) Apply Nailite High Gloss Tackless Sealer in a thin, even layer. If a soak off Colored Gel Polish service is desired, seal with Nailite Gentle Gloss.
- 12) Cure in a 9 Watt lamp for 2 minutes. No tacky residue will remain.
