

## **HOW TO APPLY NAILITE GEL**

- 1) Prep Nails:  
Push back cuticles, lightly buff shine off, dust & wipe nail with either 99% alcohol, pure acetone or similar.
- 2) Apply plastic nail tip.
- 3) File, shape, buff nails as desired.
- 4) Using a lint free nail wipe and 99% alcohol, remove all dust and oils.
- 4) Apply a thin coat of gel starting at the cuticle and brushing to the free edge.
- 5) Cure two minutes.
- 6) Apply a second thin coat brushing from the cuticle to free edge. (A third coat can be applied if needed.)
- 7) Cure 2 minutes.
- 8) Using a lint free nail wipe and 99% alcohol, remove all dust and oils.
- 9) Buff and file the nail as needed.

All our gels are self leveling, do not require any special primers or preps and will cure with a 9 Watt lamp or higher. For clients needing extra adhesion, use Something Wonderful or Primer. Be careful that NO gel comes anywhere near the skin. This will cause lifting. To seal your gel nails, either use High Gloss Tackless Sealer or if using nail polish, Thin Gel Coat.
