

HOW TO APPLY STRIPING TAPE

- 1) Cut or peel off length of tape longer than the nail you are working on and place onto tacky nail polish.
- 2) Using nippers, NOT scissors, cut off the excess from the back edge of the nail and press the edge into polish.
- 3) Cut off the excess from the free edge of the nail approximately 1/16" in from the edge. Using the point of the nippers, press the end into the polish.
- 4) Repeat steps 1,2 and 3 until the desired effect is complete.
- 5) Coat the entire nail LIGHTLY with top coat. Apply a second coat if necessary. (Applying a THICK layer of top coat will cause lifting)
